SKILLS

Deployment & Operations

- Implementing CI/CD pipelines with GitHub Actions for automated builds and deploys
- Deploying and managing services on modern cloud platforms (AWS, Vercel)
- Monitoring application performance and health to ensure high availability

End-to-End Development & Integration

- Building responsive UIs (React, Next.js) connected to robust backend APIs (Node.js, Python)
- Integrating LLMs (OpenAI, Llama) and third-party services to enhance application intelligence
- Writing comprehensive tests across the stack, from unit (Vitest) to E2E tests (Playwright)

Frontend Development

- Building complex applications with React, Next.js, and TypeScript
- Efficient state management (Redux, Zustand) and API data fetching
- End-to-end testing with Playwright/Cypress and performance auditing with Lighthouse

CERTIFICATIONS

Google Project Management

Coursera - May 2023

Natural Language Processing

Coursera - May 2023

Big Data

Coursera - Jan 2023

AI Foundations for Everyone

Coursera - Jan 2022

EDUCATION

Bachelor of Artificial Intelligence

FPT University
Jan 2023

PROFESSIONAL SUMMARY

As a Full-stack Developer, I specialize in building complete applications, bridging the gap between complex back-end logic and intuitive user interfaces. My expertise covers the entire development lifecycle: architecting scalable databases (PostgreSQL, MongoDB), developing secure APIs (Node.js, Python), and building responsive front-ends (React, Next.js) that deliver a seamless user experience.

PROFESSIONAL EXPERIENCE

Software Engineer

Terralogic

May 2025 - Present
HCM, Viet Nam - Full-time

- Delivering full-stack features for enterprise platforms while establishing coding standards (TypeScript strict mode, ESLint/Prettier configs, PR review guidelines) across the Terralogic product guild.
- Designed and shipped modular Next.js experiences backed by a GraphQL gateway, improving page responsiveness by 35%.
 - Rolled out contract testing and Playwright suites in CI, cutting production regressions to near-zero.
 - Led a weekly engineering design review that accelerated feedback loops between product design and delivery squads.

Associate Software Engineer

Terralogic

Mar 2024 - May 2025
HCM, Viet Nam - Full-time

- Contributed to the digital operations suite for Terralogic clients, translating product specs into resilient services and UI workflows.
- Implemented TypeScript APIs on Node.js and PostgreSQL that reduced order-processing latency by 28%.
 - Collaborated with the design org to create an accessible component library, enabling faster feature prototyping.
 - Deployed Grafana monitoring dashboards and on-call playbooks that reduced incident triage time from hours to minutes, contributing to 99.9% system uptime.

AI Engineer Intern

Gradients Technologies

Aug 2022 - Dec 2022
HCM - VietNam

- Conducted research on advanced AI algorithms and integrated them into real-world company projects.
- Researched and applied Large Language Models (LLMs) for text-based tasks
 - Implemented Computer Vision models including U2-Net and U-Net for image diagnostics
 - Applied AI solutions for apparel analysis and recommendation in practical projects

FEATURED PROJECTS

Aurora Growth Suite Dashboard

Lead Product Designer | 2023 – Present

Unified Aurora's analytics portfolio into a cohesive growth operations hub.

- Figma Tokens Next.js Storybook Playwright
- +28% Activation lift Handoff cycle reduced from 3 weeks to 10 days Iteration velocity
- Analytics workflow tickets down 41% Support load

Creatr - AI-Powered Content Platform

Full-Stack Developer & UI/UX Designer | 2024-Present

Built a modern content creation platform with AI assistance, real-time features, and comprehensive analytics.

- Next.js 15 React 19 Convex Clerk Google Gemini AI ImageKit Tailwind CSS v4
- TypeScript
- Real-time data sync with <100ms latency Performance
- Mobile-responsive design across all devices User Experience
- Intelligent content suggestions and optimization AI Integration

Nexa Insights Platform Migration

Senior Frontend Engineer | 2020 – 2023

Rebuilt a legacy analytics product as a resilient Next.js platform with global reach.

- Next.js TypeScript Vercel Turbopack
- Median LCP improved from 4.6s to 1.8s Performance 99.95% uptime across 14 markets Reliability
- Unlocked simultaneous editing for distributed analysts Collaboration
